A KS convergence
T3 Kruskal-Wallis
T4 Pearson χ^2 GOF
T6 Fligner-Killeen
T8 Cochran's Q
T9 Median
$n^{-1/2}$ reference
MC KS floor
KS distance to reference null
10^{-1}
10^{-2}
10^{1}
10^{2}
Sample size per group, n (T4 uses total max(5n, 30))
B Tail vs full-distribution adequacy
T1 Student t
T2 ANOVA
T3 Kruskal-Wallis
T4 Pearson χ^2 GOF
T5 Bartlett
T6 Fligner-Killeen
T7 Sign
T8 Cochran's Q
T9 Median
T10 Hotelling T^2
>500
n^*_α
n^*_{KS}
10^{1}
10^{2}
First n meeting the empirical criterion
